## Migration for Yocto 2.7 Warrior and 3.1 Dunfell

The new image is based on the new Yocto Project Version 3.1 "dunfell" instead of 2.4 "rocko".

### Migration

The migration can be performed with CURT (1).

To flash a 2.4 "rocko" image or reinstall a 2.7 "warrior" image the new CURT (2) is required.

To flash a 2.4 "rocko", 2.7 "warrior" image or reinstall a 3.1 "dunfell" image the new CURT (3) is required.

When switching between version 2.4 "rocko", 2.7 "warrior" and 3.1 "dunfell" the U-Boot must be updated.

➔ `CHRIST_UPDATE_INCLUDE_UBOOT = "1"`

3.1 dunfell → 2.4 rocko			

The migration has no effect on the possibility to switch back to a 2.4 "rocko" or 2.7 "warrior" image, because the system is backwards compatible. Just make sure to update the U-Boot.
